Coach Kenson speaking at the SSC Pep Rally before the Hancock Game.

By: The SSC Newspaper Staff

When we asked St. Stanislaus football Coach Dave Kenson for an interview, he politely replied, "yes," and then he later gave up some time in his busy schedule to talk SSC Football. His prompt positive response and his punctuality said a lot about him, even before the questions began. We asked him first to talk about his background. " This is my second year at St. Stanislaus. Before that, I coached college football at the University of Cincinnatti. I was a head high school football coach at the age of twenty-three, and I coached football for twenty years. Later I left coaching to go into business; I was a vice-president of a life insurance company, and from there I retired in 1992. I was living in Florida, and I found myself working on a novel."

The novel did not become a bestseller, we learned from coach, but his absence in the literary world became our gain at SSC.

"Coach, talk about your current team. How is it different from last year's team?"

"We had a rough season last year, but we had a nucleus of core players and we gained valuable experience. We've also got a very dedicated staff: Stan Dellenger, Errol Gauff, Chris Yeager, Jay Ladner, Stace McRaney , and Will Seymour. We've added players, people who did not play last year. The present team has more experience, a lot more intensity, and a better chemistry."

" How would you define a better chemistry?"

" The players get along with each other much better than they did last year. They are not constantly putting each other down. Also, we have more effective leaders this year. Before you can be a leader, you have to be a good follower. We're gradually developing that philosophy now, and the players are buying into it. It's not just one person who is a leader; It's somebody new each week. Some kids are leaders in that they know how to say the right thing at just the right time. Others lead by quiet example."

"We're learning how to make fewer mistakes. Our offense is inconsistent, but with the less mistakes we capitalize in more points. We play well defensively and with consistence. We are getting a lot of people to the ball. We're gang tackling and making big plays."

" How about key players, Coach?"

" I could highlight some, but we've had a lot of kids play really well this year."

" Coach, could you give some thoughts on school support?"

" We had a hard year last year, and it takes everybody to turn the corner, to bring it back. We're doing that. The players know when teachers are at the game. We've gotten great support last year and this year. It's a school thing, too, especially the last game we played against Pearl River Central. The crowd was really vocal. The kids know when everybody is a part of the football program. In that game, there were lots of big plays and crucial situations. The game was swinging back and forth, and our crowd was great."

" Coach, if you had a wish list for the team, what would be at the top?"

" I would wish that the guys would be able to get the rewards they deserve for as hard as they work."

" Anything else?"

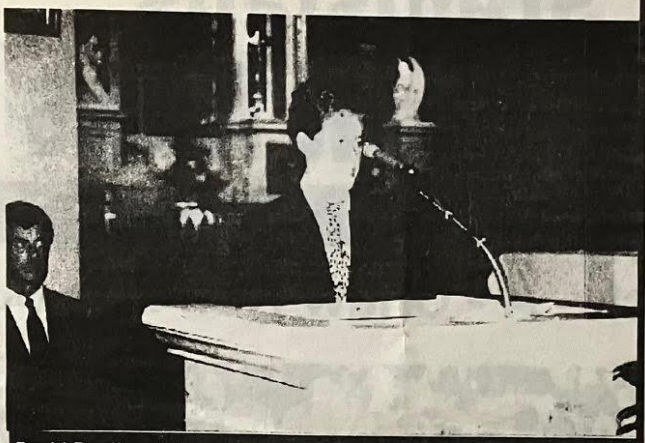
" That's pretty much it."

We think the team has gotten one wish already: Coach Kenson and the SSC football staff.

The Big Brother, Little Brother Ceremony

By: Newspaper Staff

On Monday, September 24th, St.Stanislaus held its Big Brother, Little Brother Ceremony as senior classmen were paired with their younger "Brothers." Mr. Andy Kivlan and Brother Adrian Gaudin, SC served as CO-Moderators for the event, and they will share in the coordination of Big Brother, Little Brother activities scheduled for the school year. Mr. Ed Grotkowski and some band students provided music for the ceremony. After a welcome to everyone extended by Mr. Kivlan, Student Council President Daniel Osorno read a scripture reading.



David Bradley giving his speech about the concerns and importance of the Big Brother, Little Brother program.

Brother Ronald Hingle, Principal, offered his own observations about the special relationship he shares with his fellow Brothers of the Sacred Heart. Brother Ronald extended his hope that the SSC Big and Little Brothers will develop their own special relationships throughout the course of the school year. Senior David Byrne shared his thoughts about what it means to serve as a Big Brother, and seventh grade student David Bradley articulated his little brother concerns. The following is an excerpt of David's speech:

"As we enter this new school year with dreams and doubts, we meet our big brothers. We are excited and eager to get to know and talk to these seniors. We hope to achieve good friendships with our big brothers by discussing our common interests and goals."

Following a candle ceremony under the guidance of Brother Adrian, the Big Brother, Little Brother pairs were introduced by Mr. Kivlan. Later all in attendance enjoyed a reception hosted by Mrs. Mary Dillenkoffer and the Parent Leadership Team.

Drama Delivers

By: Newspaper Staff

The 1997-1998 SSC school year welcomed the addition of a formal drama class taught by Mrs. Terry Carr. Mrs. Carr has had much experience with high school drama, having taught it at other schools prior to her tenure at St. Stanislaus. On Tuesday, September 1st, the Covenant Players of Los Angeles, Gulf Coast Division, presented a workshop at St. Stanislaus for drama students. Under the direction of Ms. Pam Cowser, manager, the troupe performed demonstrations of improvisations by four actors who guided students in the arts of role-playing and improvisation. The theatrical treat was enjoyed by all in attendance.

Mrs. Carr recently conducted auditions for a production of "Twelve Angry People," an adaptation of Reginald Rose's famous play, "Twelve Angry Men." Inside information gives rave reviews for the aspiring actors who gave their best at auditions. We look forward to the play's participation in a competition which will be in Hattiesburg at the Southern Mississippi Drama Festival, and we wish the performers from St. Stanislaus and Our Lady Academy, under the direction of Mrs. Carr, our very best at competition time.

The Key Club

By: Diego Alvarez Ytorria

My name is Diego Alvarez Ytorria and I am a member of the Key Club. This is my first year here at St. Stanislaus. I joined the Key Club thanks to a friend who invited me to a meeting.

In my first meeting I thought it was going to be boring, but I found a lot of people playing around and laughing. I understood that Key Club was a fun experience.

I found that it is not too hard to help people and that sometimes you don't know, that with a little help, you are giving a lot to these people you are helping. I also think that it is fun. This is because you make a lot of friends and most of the time you enjoy your work because it is fun. Also when you help people you feel great happiness inside. I think the Key Club is also helping me to be a man of character in life. I think it is a need of everyone to help others, and I found a great opportunity here in Key Club. I think, if we can make a society, in which everybody helps each other, we can change the world. Maybe we are not going to change the world by ourselves, but with help from some friends we may someday change for the better.

When you give things with love, you receive a gift that is better than anything on Earth, and it directly comes from heaven.

I want to finish by saying that I am very proud to be in the Key Club, and I encourage all people to come and join us.

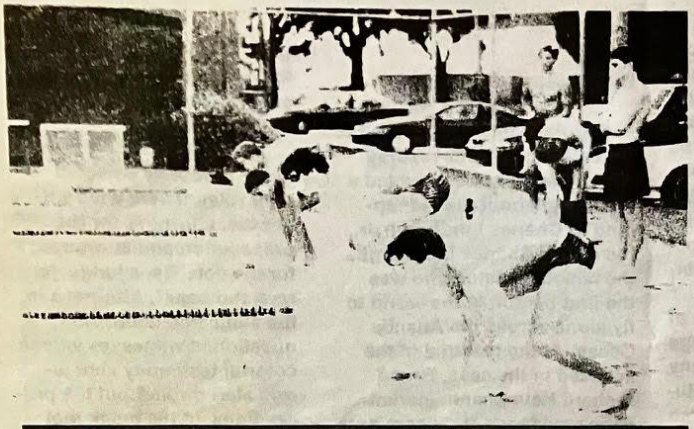
Mathcounts

By: Andrew Waterman

MathCounts is a program for students who excel in math and who would like to compete with others at school, state, and national levels. It usually takes place after school on Wednesdays.

Brother Ronald Talbot runs the MathCounts program. It targets those who are at advanced levels in math studies. These students are in the seventh grade Pre-Algebra class and eighth grade Algebra 1 class. Presently we have six or seven members, and we would like more. If you think you can handle this challenge, please stop by on a Wednesday afternoon in room 207. We hope to see you there!

Breaking Waves with the Rocks



The SSC swim team is shown here practicing.

By: Coach Joe Gex

The SSC swim team opened the 1998 season against Biloxi High School on September 10th at the Biloxi Natatorium. The Rocks soundly defeated the Indians by the score of 96-67. The Rocks have not lost to the Indians under Coach Joe Gex's tenure as head coach. SSC won eight of the 11 events in the dual meet. The team set four school records during the meet. Jamie Higgins, a junior from Missouri, set a school record in the 200 yard individual medley with a time of 2:1 5.87. Thad David, a sophomore from Bay St. Louis, broke the l00 yard Freestyle record with a time of 59.3 1. Robin Herndon, a junior from Fairhope, Alabama, broke the l 00 yard Breaststroke record with a time of 1: 1 2.76. The 400-yard Freestyle Relay team of Higgins, Herndon, David, and Andrew Nestor set the school record with a time of 4:02.83.

On September 26, the Rocks hosted St. John High School in a dual meet. The Rocks improved their record to 2-0 with a 121-30 win over the Eagles. Two school records were recorded in the meet. Jamie Higgins set a new record in the 100 yard Butterfly with a time of 1:08.80. Robin Herndon broke his own record in the 100 yard Breaststroke with a time of 1: 1 2.27. The Rocks won IO of 11 events in the competition.

SSC hosted their second meet at the SSC Pool on September 23 against the Ocean Springs Greyhounds. Ocean Springs handed Coach Gex's squad their first loss of the season by the score of 86-76. It was also the team's first loss at home in three years. The Greyhounds held off a charging Rock-a-Chaw team that was down during the meet by as many as 1 8 points. SSC had a chance to win the meet by one point on the last event but missed out on the opportunity. Two school records were set in the loss to the Greyhounds. Jamie Higgins broke Robin Herndon's school record in the 100 yard Breaststroke with a time of 1:1 2.24. The 400-yard relay team of Higgins, Thad David, Andrew Nestor, and Billy Bourgeois shattered the old record and became the first team in SSC history to break the four-minute barrier in the event. Their time in the event was 3:59.23.

"The team started the year off great but kind of got into a rut after the second meet. Against Biloxi and St. John, we swam well. However, when we swam Ocean Springs I think we did not take them seriously enough at the start of the meet. We let ourselves get too far down too early. We made a strong run at them but they had just a little too much lead on us."

"I think we will learn from our mistake and bounce back for our last dual meet of the year against Harrison Central and the championship meets that follow. We know that it will take hard work and determination to finish this. We are already making the adjustments to accomplish this."

"I have seen some great performances this year from our team. Jamie Higgins and Robin Herndon, our two new transfers, are doing well for us. Thad David and Andrew Nestor have improved tremendously from last year. A welcome addition in the fly has been seventh grader Jeffrey Fine. Plus, we are getting increasingly better performances from veterans Matt Finnila, Chris Mensi, Billy Bourgeois, Ryan Veach, Evan Tusa, and Patrick Clark each week. Donald Kimberland, *and eighth grader from Texas, shows great promise and is getting better each week in the freestyle events."*

"It is good to see us breaking records each meet. Records are set to be broken. However, we want the team to succeed. The kids know that as well. We always stress that there is no " I " in team. When we win it is a team effort, and when we lose it is a team loss."

Forecast for the Game: " A Hurricane Will Hit Hancock"

By: Trey Schorr

The first Pep Rally was held on Friday, September 25. It was very entertaining. O.L.A. sponsored a funny hat contest. And, there were some funny hats! One guy wore a glove on his head. Another had a 'fro. One of the football players wore a hat with a propeller on top of a clown wig.

One of the most memorable parts of the rally was when three blue hawks flew in and started causing trouble. The Rock-A-Chaw mascot beat them up with ease. When two were caged in, he clipped the last one's wings. Then, he tossed it into the cage with its friends. Later, when nobody was watching, the hawks got out and flew away.

At last, Coach Kenson came out and was applauded by the team. He said there have been different stages that this hurricane has gone through, and it's the same with the team. There had been times that it was unorganized, just like our team. It had also done some damage. The Rocks have played very hard the whole season. The coach said they had been practicing and practicing, and that they were ready for this game. He claimed," Tonight, a hurricane will hit Hancock field!" Everyone cheered. The game result: Rocks- 21; Hawks-12. Coach Kenson was right.

Senior David Byrne is pushed down by the Blue Hawks. while the SSC mascot gets ready to take them down during the first SSC Pep Rally of the '98 school year.

Calculus Class

By: Andres Osorno

Calculus class is a really challenging experience. Something very special about this class compared to others is that the student does not only learn about calculus, but we also learn about college, the stock market, applications of calculus in daily life, graphing calculator utilities, and more. These parts of the class are reflected in projects that Mr. Gemelli asks us to do. These projects include résumé, math websites form colleges all around the nation, and graphing calculator programs.

The résumé is done for the purpose of college application. Every student turned in his résumé, and Mr. Gemelli made suggestions for us to consider. By this, he is helping the students to increase the opportunity of attending the college of our choice and placing us ahead of many other students across the nation.

With the math websites from colleges around the country, we learn about their requirements, *math level, and calculus related* information available in colleges, which could be useful for the class.

Finally, we researched throughout the web for programs that could be used in our calculators, particularly the TI83 and TI 86. These programs included math and science utilities that could be of great importance while taking the ACT and with math and science subjects at school and college. These programs would be available for many students since the math department acquired graph links that allow downloading the programs from the Internet to a PC or Macintosh, and then transferring them to the TI calculator.

I am proud to be a member of the class. It is truly a college preparatory class. It offers many branches and options for the student to develop his mind, research skills, and understanding of life.

Mock Trial in Enrichment Class

By: Newspaper Staff

For the past three weeks the seventh-eight-grade reading enrichment class conducted a mock trial about the kidnapping of Charles Lindbergh Jr., the son of Charles Lindbergh, the famous aviator who was the first person in the world to fly alone across the Atlantic Ocean. At the real trial of the accused in the case, Bruno Richard Hauptmann, incriminating evidence, a ransom note and recovered ransom money, pointed toward Hauptmann's guilt. Bruno Hauptmann was later executed for the kidnapping and murder of the Lindbergh baby.

During the mock trial, students randomly selected their roles. There were witnesses, attorneys for the prosecution and attorneys for the defense, a judge, jurors and bailiff. Attorneys in the simulated courtroom questioned witnesses whose colorful testimony kept jurors alert throughout the proceedings. In the mock trial, history was changed as jurors delivered a verdict of innocence. Hauptmann's innocence or guilt, however, remains an unsolved mystery.

This is a drawing by Tyler Gallagher which shows what happened during the Mock Trial in Reading Enrichment.

The Graphing Calculator

By: Marc Cerisier

The graphing calculator can be a real gift at times, when one knows how to use it properly. From personal experience, I know that the best way for someone to master it is by using, it a lot and by trial and error. Any time that there is a device that does everything except wash the dishes, it is going to be a bit on the tricky side to operate. The best advice that I could give is just to take it slowly, and do not try to master everything at once, but learn one thing at a time.

A good way to start to explore the calculator is to take a math book, and try to solve the examples, since they have answers that are correct. After the correct answer has been found a few times, it can be assumed that this feature of the calculator has been mastered. Of course, there are some functions of the graphing calculator that seem unclear until practiced and mastered. In these cases, the user's manual should be the first place visited. If it is too cryptic, and it often is, the next best thing would be to ask an upperclassman for help. Most of them know a thing or two about calculators, and if they do not, they know someone, who does.

Obviously, in this article it would have been impossible to cover all aspects of graphing calculators. This article is intended to give a general overview about where to start and what to do with a graphing calculator. Someone can not expect to sit down and instantly be able to do augmented matrix problems or solve simultaneous equations, but if taken slowly, these calculations will be understood in no time at all. And remember, if something is not clear or does not work when it is attempted, ask for help. The only stupid question is the question not asked.

NHS and NJHS Elected

By Padrick Dennis

The National Honor Society and the National Junior Honor Society have elected new officers for the 1998-1999 school year. National Honor Society members as follows: President, Roger Ridgeway, Vice-President, Justin Wadsworth, Secretary, Michael Dauro, and Treasurer, Mylon Labat National Junior Honor Society offices have also been elected: President, Cherubin, Alcalen, Vice-President, Kunal Patel, Treasurer, Sherwin Leung, Secretary, Brian Butler, and Service Project Chairman, Ryan Davis.

Members of the both societies must maintain a 3.5 grade point average. The societies try to create enthusiasm for scholarship, service, leadership, and characters. Members must set examples in each of these four categories. The moderator for both societies is Mrs. Mary Castleberry.

This school year both groups will be active and taking on service projects still to be determined. Congratulations to students qualifying for membership in these honor societies.

Senior Profiles

Brandon Everett

If senior Brandon Everett passes you in the hall on his way to a class, he will probably greet you with an upbeat "good morning." You can count on his friendly smile. It's always easier to begin a conversation with someone who smiles, and we asked Brandon if he would allow the Rock-A-Chaw to interview him. "Sure," was his casual reply as he headed down the hall.

Later that day Brandon talked about his love for soccer, which began way back in elementary school. He started playing at the age of six, and he hasn't stopped since. Brandon currently plays on the varsity soccer team coached by Mr. Andy Kivlan.

"Why do you prefer soccer to other sports?" we asked.

"Soccer is a year-round sport. It can be played during any season. Also, it's a non-stop action sport. There are no long breaks during the game."

"Which position do you play?"

"I'm a right full back."

"Okay, what does a right full back do?"

"I defend. I mark a certain player on the other team, and I try to keep him from advancing the ball. It's a key marking position."

"What's your most memorable soccer experience?"

"That would have to be playing Clinton last year. We may have lost the game, but overall the spirit of the school coming out to support us allowed me to play for the school, instead of just for the team or myself."

"What's it like to be a senior this school year?"

"There are much more responsibilities, and one has to show leadership and step up. We have to make examples for the other members of the team."

"What's the best thing about being a senior?"

"People in the school look up to seniors; they expect seniors to be a voice. I don't know; it's new to me; I haven't been a senior that long."

"What's not great about being a senior?"

"You realize it's your last year, and I'll miss my friends. Some people don't want to leave."

"Brandon, do you have any words of advice for aspiring soccer players?"

"It takes hours of practicing every day. Stay fit. A player has to know the game. Watch a lot of professional games; that teaches me a lot. One has to be a team player and have an overall good attitude. It is also helpful to join organizations such as recreational or select soccer with training, which can improve one's skills immensely. I am currently in training along with other members of the team: Ronnie Vanney, Justin Wadsworth, Nick Middleton, John Rich, and Jonathan Gagnon. I believe this extra training will make St. Stanislaus a stronger, more physically fit team this year."

"We lost a couple of seniors last year, but strong underclassman are stepping up this year. These are players like sophomores Matt Powell, Neil Farve, and juniors John Rich, Brandon Lewis, and Kenny Harshbarger."

Brandon Everett smiled at the end of the interview. As he turned to leave, it was apparent that he is a focused, articulate young man, an excellent soccer player and an exemplary senior.

Kris Schaumburg

Catching up with senior Kris Schaumburg is not easy to do. Kris recently was named a PSAT National Merit Semifinalist, the only SSC senior to achieve this honor. Kris generously gave us some time for an interview.

"Kris, a PSAT National Merit Semifinalist is quite an accomplishment, and we congratulate you. When do you advance to the next step, finalist status?"

"I believe that takes place in April. I'll know then."

"Are you entitled to receive college scholarships-due to your academic achievement?"

"I think there is scholarship money."

"Do you have any college in mind?"

"Tulane University is one, and Loyola is another. Also, USL is a possibility."

"How long have you been at St. Stanislaus, and how has the school prepared you for challenges such as these?"

"I have been at St. Stanislaus since the seventh grade. I think the school teaches us responsibility, helps us to set up our moral values for later in life, and teaches us how to interact in a society."

"Kris, do you have some advice for younger students?"

"I guess I would tell them to make sure they are thinking about their academics, but they should also have fun. They shouldn't be totally absorbed in school work, and they shouldn't take life too seriously."

"Would you share your thoughts about St. Stanislaus?"

"Members of the faculty have good relationships with students. I would like to see some movement toward student privileges such as more themes for pep rallies and perhaps free dress days."

"What is the best thing about being a senior?"

"I think it is being at the top rank of the school society."

"Are their drawbacks to being a senior?"

"The only one is more responsibility."

Kris is a very impressive person who seems to be handling his responsibilities well, heeding his academics and enjoying his senior year.

Jerry Slimmer

Senior Jeremy Slimmer has a knowing look on his face, and it gives the impression that he has been at St. Stanislaus for a time. When the Rock-A-Chaw expressed an interest in interviewing him, he very cordially agreed to speak to us.

Jeremy has been around St. Stanislaus for a time: six years. He started attending school here in the sixth grade, and he is currently enjoying his seventh SSC year. Jeremy is active as a student minister. He explained that only seniors are allowed to serve as student ministers. He enjoys that part of his school life under the direction of Mrs. Adrienne Quinlan, whom he has known since he was a sixth grade student. He credits Mrs. Quinlan and her husband with motivating him toward student ministry. We asked him to elaborate.

"I want to help people," he said with a calm confidence. "I seem to do well with helping people, and so I gave student ministry a shot. So far, it's been wonderful."

"What do you find gratifying about being a student minister?"

"The most gratifying moments are knowing that I'm doing my part, not sitting by the wayside. I'm trying to do something for somebody else's benefit."

"What's the best thing about being a senior?"

"It's the responsibility. After so many years, people look up to seniors for leadership, and there is the feeling that - it's our time. It's also knowing that graduation is near, and it's been fun, seven years in one place."

"What's your least favorite thing about being a senior?"

"That would have to be the work. The work tries my patience because graduation is in sight, but there is still one more school year."

"Jeremy, what advice can you offer younger students?"

"Hang in there. It gets better from here. Each year the younger students will see that they have more privileges and more fun."

"Since you work with faculty members in your student ministry capacity, would you like to share any thoughts about your faculty-student relationship?"

"We have the best faculty I've ever seen. St. Stanislaus has, without a doubt, the best faculty in the area."

"Jeremy, you obviously enjoy being a student minister. Do you have any other school interests?"

"I'm involved in quiz bowl; I'm the captain. I am also the senior basketball manager, and I enjoy that, too.,,

Jeremy Slimmer concluded his interview with a quiet confidence and positive outlook, and it was reassuring to know that he is one senior, among many, who genuinely likes to help others.

Michael Prendergast

Senior Michael Prendergast agreed to be interviewed by the Rock-A-Chaw during his lunch period. It was a beautiful afternoon, and Michael's friendly personality was apparent throughout the course of the interview.

"Michael, how long have you been a student at St. Stanislaus?"

"I've been a student here for six years. I started in the seventh grade."

"What SSC activities or interests do you enjoy?"

"I play football; I'm on the Student Council. I'm a Student Minister. I also work as a Basketball Manager, and I participate in the FCA."

"What is the FCA?"

"It's the Fellowship for Christian Athletes."

"Michael, you're one busy senior. Why did you become a Student Minister?"

"Basically I just wanted to help people."

"You said you're a football player. What position do you play?"

"I'm the center."

"That seems like a very responsible position."

"It is important because the play starts with the center giving the ball to the quarterback."

"If you could play another position, what would that be?"

"I'd like to try being a receiver. A lot rides on the receiver catching the ball."

"Michael, what are your views of this year's team?"

"I didn't play last year, but it's obvious there are a lot of improvements with this year's team. We have a chance to make it to the playoffs this year. The homecoming game should be really exciting, a great game to watch."

"What do you like best about being a senior?"

"That would have to be leadership. Being a senior feels like a big accomplishment, and the leadership is part of the accomplishment."

"Are there drawbacks to being a senior?"

"The only one I can think of is the added responsibility."

"Do you have any words of advice for younger students?"

"It's not easy starting in a new school. The younger students should hang in there and see it through. The teachers are nice and they are willing to help."

"Michael, you recently returned from your senior retreat. How was that experience?"

"It was great. It helped me to open up to a lot of things and to find gifts that I didn't know I had."

Michael smiled when he spoke of the gifts he didn't know he had. This friendly senior has obviously been blessed with many fine gifts.

Homecoming... "Saturday Night Fever"

By: Newspaper Staff

The SSC Homecoming activities begin Friday, October 23rd with the much anticipated game against Petal. On Saturday, October 24th, St. Stanislaus will hold its homecoming dance at the Bay-Waveland Yacht Club from eight to twelve p.m.
The dance is open to students in grades nine through twelve, and the theme for the festivities is "Saturday Night Fever."

We asked for comments about our varsity football team, and members of the faculty and student body responded.

"I think the team is wonderful, and it looks like they're giving one hundred percent. I think they always represent our school well by demonstration of Christian sportsmanship." Mrs. Clark

"They are a lot better than last year." Adair Beany

"I think the team is doing much better than last year, and they should keep it up, so we can be even better next year." Rik Marsh

"I think the team is doing much better than last year, and the offense keeps doing a good job, we should be successful." Justin Pucheu

"Winning is all due to teamwork. Coaches, players, fans, managers all need to work as a team to be successful. We, as a team, are now doing that. No one person wins or loses a game. 'Believe and achieve' is our theme this year. If the whole team believes this year, we will all achieve." Willie Golden

Thanks, readers, for your comments. Good luck tonight, Rocks! See you at the game!

GO ROCKS!!

A Word of Thanks

Dear Readers,

This paper is here today for your interest solely because a small number of students made good on their word. They signed up for the newspaper, and they honored their commitment. A number of students initially signed up to work on the paper, but as meetings convened it became increasingly apparent that many students either forgot to attend or had some other interest to pursue. A handful however, faithfully showed up. There was no token verbal interest; they were there when they were asked to be there, and they were sincere in their endeavor to get the Rock-A-Chaw off the ground. They were there with positive attitudes and admirable work ethics, and they made this paper possible. And so it is with much thankfulness to these students that the Rock-A-Chaw gratefully acknowledges them:

Editor..... Kunal Patel

Staff Writers..... Padrick Dennis
James Fulford
Kunal Patel
Trey Schorr
Adair Beany

Reporters..... Matthew Burke
Padrick Dennis

Photographers..... Matthew Burke
Ryan Davis
Trey Schorr

Cartoonist..... Tyler Gallagher

The Rock-A-Chaw also gratefully acknowledges those students who contributed articles and opinions for publications. Thanks also to Brother Ronald Hingle, Mrs. Susan Estrade, for further assistance, Ms. Leah Preble, and Mr. Tom Ackerman. Thanks also to those teachers who submitted articles and to those students and teachers who agreed to be interviewed. The Rock-A-Chaw welcomes future submissions for our next publication, and we hope to see more students on our staff. Please join us in making the Rock-A-Chaw the proud voice of SSC.

Thank you for reading this issue of the Rock-A-Chaw News.
Please look for more issues still to come.
